#### What do robots like

#### Clean, Repetitive & Standardized

### Welcome to a day in the field

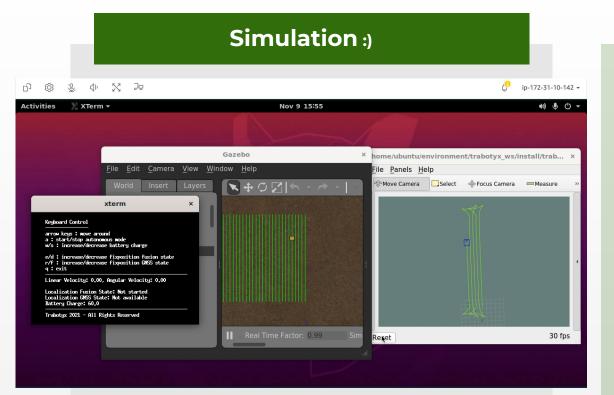

### Welcome to a day in the field

### Agricultural robotics is hard, because off endless edge cases

#### Reality :(

### Agricultural robotics is hard, because off endless edge cases

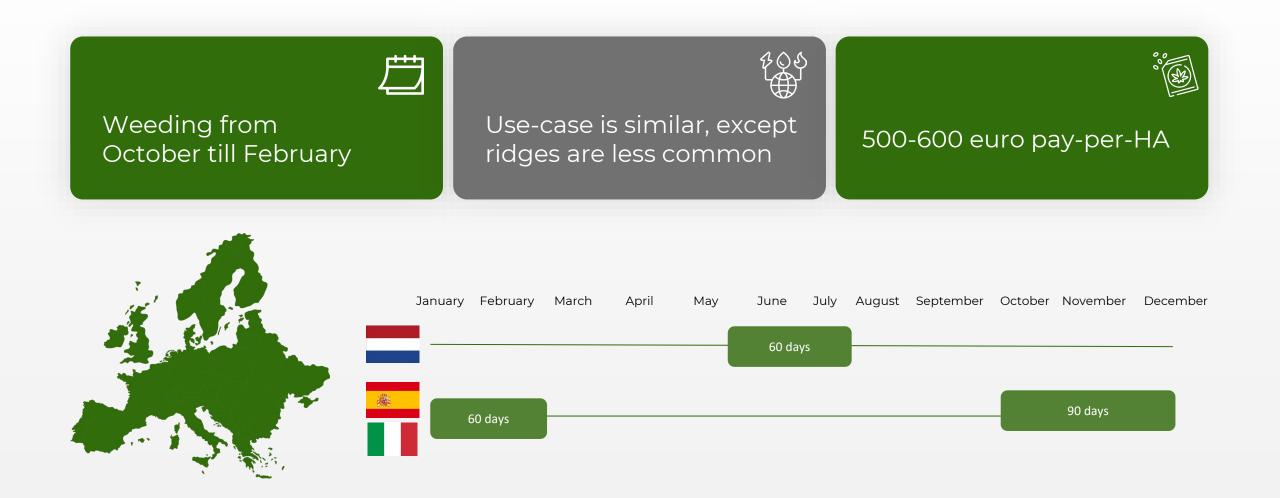

#### Which weed to choose

Т**RAB** 

## Adding weeding in South of Europe allows for 210 days of utilization per year

**ТКАВ СТУХ** 

## How to make the transition to field automation successful

- Farmers should be able to try robotica with only operational risk, not financial
- 2. End-user subsidies should be focused on using and not on buying
- 3. Suppliers should really really really undersell, because farming is about mastering edge cases and that is very difficult
