Insect slurry as a wet local ingredient for Poultry in Nigeria - SMP24007

December 2024

Arya Rezaei Far (WLR), Natalia Naranjo Guevara (NGN)

Background

The problem

Nigeria's feed and poultry sectors face ingredient shortage, threatening food security.

Insects offer potential as an alternative locally produced ingredient while processing larvae to dried meal is a challenge for insect farmers in Nigeria and increases environmental impact in the Netherlands

The approach

Build a consortium to test the production of a less-processed BSF product as a feed ingredient in Nigeria

The product

Black Soldier Fly larvae slurry; low processing cost, rich in protein and energy

The solution

Introducing Black Soldier Fly larvae (BSF) as a local, stable, and nutritious ingredient

Industrial lead: New Generation Nutrition

15 minpact with insects

Wadudu OvoCON IITA ILRI Agricultural Consulate Wageningen Livestock Research

Methodology

BSF Slurry

	g/kg as is		mg/kg as is
Ca	4.7	Zinc	21
Р	3.5	Iron	70
Mg	1.1	Mn	50
К	4.5	Na	4
		Cu	3

	Log 10 CFU/g	
Total viable bacteria	6.2	
Total viable fungi	4.8	

Business Case

• Soy bean meal: ₦1250 (€0.74)

g/kg feed 13 crude protein 1.4 Fat 700 mg Lauric acid

Conclusions

- There is an urgent need for local, reliable, and nutritious ingredients for feed in Nigeria
- BSF slurry have promising chemical composition and acceptable microbial load
- Need to test further preservation methods; Organic acid application or fermentation
- Slurry viability: Sourcing free or low-cost substrates, optimizing logistics scaling production capacity.

Next steps

Impact of support

- Produced the slurry in lab-scale and determined challenges/risks; Preservation method and scalling up
- Prepared the financial feasibility of BSF slurry production and scenarios for its application in poultry feed; <u>Applicable to Nigeria and the Netherlands</u>
- Reinforced the partnership between knowledge institutes and private sector in Nigeria and the Netherlands and formed a Dutch-Nigerian consortium to apply for other funding tools
- Improved market position in Nigeria
